

# Venture Capital

Blacktree provides emerging and expansion-stage technology companies with a long-term investment approach, a proven ability to build value in the early stages, and access to an unparalleled network of executives, capital sources, and technology professionals. we invest at all phases of a company's life, much of our investment activity occurs at the early stages, and certainly no investment opportunity is "too early" for our consideration. Our approach helps our portfolio companies grow core businesses, launch new initiatives, make transformative acquisitions and upgrade technologies and systems to support their long-term strategy.

We're not a traditional venture capital firm. We exist for more than returns, even though it is our lifeblood. At our core, we believe entrepreneurs are the ultimate agents of positive, transformational change across every aspect of our society and economy.

To us, our work is our mission. When you spend time with us, you'll see that our firm is built by, and for, founders. It's why we invest from Series A onwards, because we want to help founders take a product that works and make it a global success. And it's why we've built the most experienced team possible, with a clear and systematic approach, to help founders turn their vision into something that changes the world for the better.

Blacktree acts as a positive economic catalyst for the companies in our corporate portfolio. We work to identify, invest in and enhance the value of great businesses.
